

## BUSI 2710

### Class 19 Extra Handout

Because of the YAWL computer difficulties during the last lab, you will need to create a new user account on the YAWL system. Using your web browser, go to this web site:

<http://54.225.123.102:8080/resourceService>

Log in with the username “admin” and password “YAWL”. Then create a new user account for yourself. Make sure you make yourself an “Administrator”. I have also created some roles and capabilities that were lost (see table on reverse). Give yourself at least one of these roles and at least one capability.

The screenshot shows a web browser window with the YAWL logo and navigation tabs. The 'Users' tab is selected, displaying a form for creating a new user. The form includes fields for Participant, First Name (Joerg), Last Name (Evermann), User ID (jevermann), and a checkbox for Administrator (checked). There are also fields for Description and Notes. A 'Privileges' section on the right lists several permissions, all of which are checked. At the bottom, there is a 'Password' section with 'New' and 'Confirm' fields, and buttons for 'Save', 'Add', 'Reset', and 'Remove'. The browser's address bar shows the URL 'ec2-107-21-186-243.compute-1.amazonaws.com'.

Enter a password and confirm it. Finally, click the “Add” button when done. Log out of YAWL and log in again using the new user account you have just created.

**DO NOT USE A CONFIDENTIAL PASSWORD, THE SYSTEM IS PUBLIC**

**DO NOT PROVIDE PERSONAL INFORMATION, THE SYSTEM IS PUBLIC**

**Available roles and Capabilities:**

<b><i>Role</i></b>	<b><i>Name of Role on YAWL System</i></b>
